# How to Use Diffuser/Vaporizer Oil

- Global Aroma Diffuser/Vaporizer oils is generally quite simple, but the exact steps can vary slightly depending on the type of diffuser you have: electric or Tea Light Candle ceramic diffuser.
- Select the Global Aroma Diffuser Oil that suits your mood or desired effect.
- Start Small: Begin with 3-5 drops of the Global Aroma Diffuser Oil for a typical room.
- Adjust as Needed: You can add more drops later if you want a stronger aroma, or fewer if you prefer a subtle scent.

# Precaution of Diffuser/Vaporizer Oil

Global Aroma Diffuser oils are primarily for diffusion. If the product explicitly states they can be used topically, always dilute them with a carrier oil (like jojoba, almond, or coconut oil) before applying to skin to prevent irritation.

Test a small patch of skin first. Generally, assume these oils are NOT for direct skin application unless otherwise stated.

- Store bottles in a secure location where children and pets cannot access them.
- During Use: Place diffusers in an area where they cannot be easily knocked over or accessed by curious hands or paws.
- Concentrated oils can damage or stain certain surfaces (plastic, painted surfaces, finished wood). Wipe up any spills immediately with a damp cloth. Place diffusers on a protective mat if necessary.

Avoid Ingestion    Avoid Contact with Eyes

**By adhering to these precautions, you can safely enjoy the aromatic benefits of Global Aroma Diffuser/Vaporizer oils in your space.**
